To the Passaic – Clifton Community,

The membership of Hatzolah has informed us of their intentions to make important improvements in their function as an organization. This will entail the involvement of numerous community members in the administration and daily running of Hatzolah. The improvements will include a committee of community doctors as a medical advisory board, and a group of community members involved in the administration and financial aspects of running the organization.

They have also asked us to be actively involved in instructing them to be more effectively vigilant in the area of *Shmiras Shabbos*.

We have a very positive view of these proposed improvements and wish them great *Hatzlocha* in implementing them.

The infusion of new community members, will certainly be of great assistance in helping them reach their goal, to supply the very highest standard of community service possible.

We hope that the community will support their efforts.
